SUMMARY

Frontend Developer with 3 years of experience building **scalable, high performance web interfaces** that improve user engagement, performance and product usability. Skilled in React, TypeScript and modern CSS frameworks, with a strong focus on reusable components, UI consistency, accessibility and performance optimization. Passionate about delivering polished, intuitive user experiences that drive measurable business impact.

TECHNICAL SKILLS

Frontend: React, TypeScript, HTML5, CSS3

UI & Styling: Tailwind CSS, Bootstrap

Tools: Git, GitHub, Figma, VS Code

Other: Angular, Python

EXPERIENCE

BrandOne Technologies
Frontend Developer

Lagos, Nigeria
February 2025 – April 2026

- Led the development of a modern, responsive company website using React and Tailwind CSS, enhancing brand credibility and improving user engagement by an estimated 30 to 40%.
- Designed and implemented a reusable React component system, accelerating feature delivery by 25% and ensuring consistent design language across the product.
- Improved frontend performance by 35% through lazy loading, optimized assets, efficient rendering, and code-splitting, leading to faster load times and smoother user interactions.
- Strengthened accessibility and usability, raising Lighthouse accessibility scores to 90+, improving inclusivity and overall product quality.
- Collaborated closely with designers and backend engineers to translate product requirements into scalable UI solutions, reducing rework and speeding up delivery cycles.
- Delivered frontend solutions for multiple client-facing web and mobile projects, improving visual consistency, responsiveness, and cross-device performance.
- Actively contributed to Agile sprint planning, technical reviews, and cross-functional discussions, helping teams ship weekly product improvements on schedule.

Value Delivered: Improved user experience, accelerated development speed, strengthened brand presence, and increased frontend scalability.

ActivEdge Technologies
Software Development Intern

Lagos, Nigeria
April 2023 – November 2023

- Built and launched a project-tracking portal that improved team accountability and workflow visibility by 40%, enabling more transparent progress monitoring across departments.
 - Optimized internal Python automation scripts, reducing processing time and improving tool reliability and operational efficiency.
 - Developed responsive UI components using HTML, CSS, and JavaScript, improving mobile usability and cross-browser consistency.
 - Supported debugging and performance tuning efforts, helping reduce recurring frontend issues by approximately 20% and improving platform stability.
 - Collaborated in a Git-based team environment, strengthening workflow efficiency and contributing to faster, more reliable releases.
- Value Delivered: Improved internal productivity, increased system reliability, and enhanced UI quality.
